

FUND STRATEGY

The Tocqueville Phoenix Fund will seek to achieve its objectives by investing primarily in the equity securities (i.e., common stocks, securities convertible into common stocks or rights or warrants to subscribe for or purchase common stocks) of domestic companies. Specifically, the Fund will primarily invest in equity securities which the portfolio managers believe to be undervalued or to represent special situations. An example of a special situation is a company undergoing change that might cause its market value to grow at a rate faster than the market generally.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The performance assumes reinvestment of capital gains and dividends. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-800-697-3863 or visiting www.tocquevillefunds.com.

^The Advisor has contractually agreed to waive management fees and/or reimburse expenses in order to ensure that the Fund's expense ratio does not exceed 1.25% (excluding taxes, interest expense, acquired fund fees and expenses, or extraordinary expenses such as litigation) until at least 3/1/2022. In the absence of these fee waivers, total returns would be lower.

Calendar Year Returns

QUARTERLY UPDATE

- During the quarter, the Fund's net asset value increased 16.42% after fees, versus increases of 21.17% for the Russell 2000 Value Index and 12.70% for the Russell 2000 Total Return Index.
- Fiscal and monetary stimulus, removal of many COVID-19 restrictions, and successful distribution of COVID-19 vaccinations helped the U.S. economy recover during the quarter. Small capitalization stocks benefited the most, experiencing outstanding double digit percentage gains due to their increased exposure to an improving domestic economy.
- The U.S. government's strategy to counter the economic impact of COVID-19 has been extraordinary. All-in, there will likely be over \$5 trillion of fiscal stimulus to help the U.S. economy recover from its near total shutdown in 2020. Importantly, it is worth noting that there will be more fiscal aid for the U.S. economy in 2021 than there was in 2020 (~\$3 trillion, versus ~\$2 trillion).
- While we are optimistic about the prospects of future economic growth, we are concerned that such dramatic government intervention in the economy may result in substantial inflation. We are already seeing evidence of such in many chemicals and building materials. Historically, value stocks, such as those we own in the Fund, have outperformed during periods of higher inflation and we are hopeful that trend will continue in the future.
- Acuity, Tegna, and U.S. Concrete were the top contributing stocks to the Fund's performance during the first quarter. Acuity benefited from an improving non-residential construction environment, Tegna from strong retransmission renewals, and U.S. Concrete from an expected infrastructure plan. II-VI, Lumentum and Harsco were the Fund's largest detractors.

FUND OBJECTIVE

The Tocqueville Phoenix Fund's investment objectives are to seek long-term preservation of capital (sufficient growth to outpace inflation over an extended period of time) and growth of capital.

DISCLOSURES

On November 15, 2019, the Tocqueville Select Fund (TSELX) was reorganized into the Tocqueville Phoenix Fund (TOPHX). Shareholders of the Select Fund received shares of the Phoenix Fund equivalent in aggregate net asset value to the aggregate net asset value of their shares in the Select Fund at the time of the reorganization. The Select Fund was liquidated and dissolved.

Mutual Fund investing involves risk. Principal loss is possible. **Past performance is not a guarantee of future results.** The Fund invests in smaller companies, which involve additional or special risks such as small companies rely on limited product lines, financial resources and business activities that may make them more susceptible than larger companies to setbacks or downturns; and small cap stocks are less liquid and more thinly traded which make them more volatile than stocks of larger companies.
