

FUND STRATEGY

The Tocqueville Phoenix Fund is a catalyst-driven small-cap value fund. The Fund investment objectives are to seek long-term preservation of capital and growth of capital by investing in small and mid-cap value companies where a catalyst for improved financial performance has been identified. Catalysts include events such as management changes, product introductions, and M&A/spin-off activity.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The performance assumes reinvestment of capital gains and dividends. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-800-697-3863 or visiting www.tocquevillefunds.com.

^The Advisor has contractually agreed to waive management fees and/or reimburse expenses in order to ensure that the Fund's expense ratio does not exceed 1.25% (excluding taxes, interest expense, acquired fund fees and expenses, or extraordinary expenses such as litigation) until at least 3/1/2023. In the absence of these fee waivers, total returns would be lower.

QUARTERLY UPDATE

- In 2021, unprecedented levels of fiscal and monetary stimulus and an elevated U.S. personal savings rate resulted in the fastest rate of economic growth (as measured by Real GDP) the United States has experienced since 1984. Unfortunately, the fiscal policies that benefited 2021 are now behind us, and in 2022, the Federal Reserve is expected to increase interest rates to control inflation. Fortunately, the Fund's performance is not solely dependent on the U.S. economy, as all the companies in our portfolio have specific catalysts and initiatives aimed to improve financial results in all economic environments.
- Historically, value stocks, such as the ones we own, have outperformed during periods of higher inflation, in part due to a higher discount rate being applied to future cash flows. This was evident in 2021, as the Russell 2000 Value Index outperformed the Russell 2000 Growth Index for the first time in the last five years.
- Over the last three years, we have refreshed approximately 60% of the portfolio, and in 2021, we added six new positions while exiting eight.
- Approximately 55% of the Fund's holdings generated higher earnings per share than they did in the year prior to the COVID-19 pandemic, and we expect that trend to continue with earnings growth to average approximately 30% in 2022. The price to forward earnings multiple of the portfolio is a modest 13 times and the free cash flow yield is approximately 8%.
- Insiders have purchased shares in over 40% of our companies within the past 12 months, and approximately 15% of the portfolio has either activist involvement and/or has commenced a strategic review process to enhance shareholder value.

FUND OBJECTIVE

DISCLOSURES

Mutual Fund investing involves risk. Principal loss is possible. **Past performance is not a guarantee of future results.** The Fund invests in smaller companies, which involve additional or special risks such as small companies rely on limited product lines, financial resources and business activities that may make them more susceptible than larger companies to setbacks or downturns; and small cap stocks are less liquid and more thinly traded which make them more volatile than stocks of larger companies.
